Andrew Martin, BA (Hons), MEd (Hons), PhD, is Professorial Research Fellow and Australian Research Council Future Fellow (2010-2014) at the University of Sydney specializing in motivation, engagement, achievement, and quantitative research methods. He is also a Registered Psychologist.

Andrew is recognized for psychological and educational research in achievement motivation and for the quantitative methods (specializing in structural equation modeling and confirmatory factor analysis, but with extensive experience in most other multivariate methods including multi-level modeling) he brings to the study of applied phenomena. Although the bulk of his research focuses on motivation, engagement, and achievement, Andrew is also published in important cognate areas such as boys' education, gifted and talented, academic resilience and academic buoyancy, personal bests, pedagogy, parenting, teacher-student relationships, and Aboriginal education. Andrew's research also bridges other disciplines through assessing motivation and engagement in sport, music, and work.

Based on International Rankings of the Most Productive Educational Psychologists (2003-2008), Andrew is 9th most published across all peer reviewed journals and the most highly published researcher from an Australian university across all peer reviewed journals (Source: Jones et al., *Contemporary Educational Psychology*, in press). He has written over 200 peer reviewed journal articles, chapters, and papers in published conference proceedings, written 3 books for parents and teachers (published in 5 languages), compiled 12 commissioned government reports, has won 10 Australian Research Council grants and 15 government and non-government research tenders, is Associate Editor of the *Journal of Educational Psychology* and Associate Editor of the *British Journal of Educational Psychology*, is on Editorial Boards of 3 international journals (*American Educational Research Journal*, *Educational and Psychological Measurement*, and *Contemporary Educational Psychology*), has reviewed for more than 35 academic journals, is assessor/reviewer for numerous international research councils and institutions, has written over 45 articles/reprints for professional and general readerships (eg. teachers, psychologists, counselors, parents), has presented over 100 invited/keynote presentations and conference papers, has conducted workshops in over 100 schools, and in recent years his work has been featured in over 200 radio, television, newspaper, newsletter, and web outlets.

In 2008 Andrew received the American Educational Research Association (AERA) Early Career Award, "To recognize a scholar who has conducted a distinguished program of cumulative educational research in any field of educational inquiry within the first decade following receipt of their doctoral degree" (AERA, 2008). Andrew was the sole researcher to win the Award across all AERA Divisions (Administration; Curriculum; Learning and Instruction; Measurement and Methodology; Counseling and Human Development; History; Sociology; Evaluation and Assessment; Professional; Postsecondary; Teacher Education; Policy and Politics). Prior to that Andrew was listed in *The Bulletin* magazine's 'SMART 100 Australians' (2003) and one of only three academics judged to be in the Top 10 in the field of Education in Australia. He and the other Australians in the SMART 100 were described by *The Bulletin* as "the smartest, most creative and innovative people in Australia . . . they are changing our world." In 2002, his PhD was judged the Most Outstanding Doctoral Dissertation in Educational Psychology by Division 15 of the American Psychological Association and before that was judged the Most Outstanding PhD in Education in Australia by the Australian Association for Research in Education.
